EDUCATION

Bennett University

Bachelor of Technology in Computer Science Engineering; CGPA: 8.86/10

India

Oct 2024 – Jul 2028

EXPERIENCE

Web3 Blockchain Developer Intern

Mar 2026 – Jul 2026

Digital South Trust

India

- Built backend modules and transaction workflows for Crypto Suraksha, a production Web3 safety platform.
- Designed and shipped News Portal REST APIs with request validation, structured errors, and Express.js.
- Debugged production request failures and hardened error paths before release.
- Owned feature delivery end-to-end: requirements, implementation, testing, and production handoff.

SELECTED OPEN SOURCE CONTRIBUTIONS

ClickHouse/ClickHouse — Merged PR #114003

- Fixed Keeper `writeAt` path that could surface `CORRUPTED_DATA` on startup.

NomicFoundation/hardhat — Merged PR #8464; hyperlane-monorepo #9181

- Hardhat: resolve `process.env` config vars before plugin hooks (incl. keystore). Hyperlane: hardened `HyperlaneMessage::from` against malformed payloads.

FilOzone/pdp — Merged PR #287; filecoin-services #566

- Emitted `PiecesScheduledForRemoval` in PDP and updated PDPVerifier ABI/event wiring across Filecoin services.

mastra-ai/mastra — Merged PRs #20487, #20518; WalletConnect #7302; viem #4903

- Mastra: never execute declined tools; reuse terminal nested snapshots. WalletConnect EventEmitter types; viem ESM `.types` for NodeNext.

PROJECTS

Krydo | TypeScript, Node.js, Express, Stellar Soroban, Firestore | [GitHub](#) | [Live](#)

Feb 2026 – Present

- Stellar-native privacy stack: 3 Soroban contracts (Authority, Credentials, Audit), SIWS + ZK sigma proofs (optional SIWE); hybrid on-chain hashes + Firestore; 8 API modules (~36 endpoints) with JWT/Zod, rate limits, Helmet/CORS.
- Shipped `krydo.in` (11 pages), Android v0.28 (13 screens, QR verify/share), shareable `/verify` URLs; 168+ Vitest tests with GitHub Actions on Node 20.

BlockForge (LabEval) | Solidity, IPFS, React | [GitHub](#) | [Live](#)

Sep 2025 – Jan 2026

- OpenZeppelin RBAC assessment contracts; IPFS CIDs on-chain (~92% storage cut); Gemini-assisted grading; NetCrypt 2026 accepted paper.

CivicSense | Solidity, Supabase, Gemini | [GitHub](#) | [Live](#)

Dec 2025 – Feb 2026

- 3-step on-chain civic lifecycle with hybrid Supabase/Sepolia storage, Gemini triage, and 12-page citizen/admin/org portals.

RESEARCH

• BlockForge: A Blockchain-Based Decentralized Platform for Transparent Academic Assessment —

Accepted, 4th International Conference on Networks and Cryptology (NetCrypt 2026); Conference Presentation, Oct 2026.

ACHIEVEMENTS

- Production open-source contributions merged into ClickHouse, Hardhat, Hyperlane, FilOzone, Mastra, WalletConnect, and viem.
- Finalist, LNMHacks 8.0 (Top 30 / 150+ teams); Top 20, Tech Triad Hackathon, IIT Kharagpur (Kshitij 2026).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Solidity, Python, Rust, C++, SQL

Backend / AI: Node.js, Express.js, REST APIs, Zod, JWT, agent tooling (Mastra)

Blockchain: Stellar Soroban, Ethereum, Hardhat, Ethers.js/viem, Hyperlane, Filecoin PDP, ZK proofs, IPFS, WalletConnect

Frontend: React, Vite, Tailwind CSS, shadcn/ui

Databases: PostgreSQL (Supabase), Firestore

Tools: Git, GitHub Actions, Vitest

Core CS: Data Structures & Algorithms, Cryptography, Distributed Systems
